PROFESSIONAL SUMMARY

Technical Service Engineer with experience across healthcare technology, system troubleshooting, software implementation, cybersecurity fundamentals, and operational leadership. Skilled at diagnosing complex application, database, and HL7 integration issues in high-pressure environments. Proven ability to lead structured troubleshooting, improve support workflows, document repeatable processes, and communicate clearly across technical and non-technical teams.

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, React, HTML, CSS, SQL

Infrastructure & Tools: Docker, PostgreSQL, SQLite, Git, IIS, Windows Server, Linux

Healthcare Technology: HL7, clinical application support, integration troubleshooting, data validation

Cybersecurity: OSINT, ethical hacking fundamentals, network security, ISC2 Certified in Cybersecurity

Professional Practices: Technical documentation, root cause analysis, process improvement, Agile, cross-functional coordination

PROFESSIONAL EXPERIENCE

Monarch Medical Technologies | Technical Service Engineer | 2024 - Present

Healthcare Technology | Remote

- Resolve complex application, database, and HL7 integration issues in high-risk clinical environments.
- Diagnose HL7 message flow, patient data, and database inconsistencies to support accurate clinical workflows.
- Lead structured troubleshooting during high-pressure incidents, helping stabilize application behavior and reduce operational disruption.
- Redesigned an internal Python application and migrated the backend from SQLite to PostgreSQL to improve reliability, scalability, and data control.
- Streamlined support workflows, reducing manual support effort by approximately 16 hours per month.
- Create technical documentation and troubleshooting notes to improve team knowledge sharing and repeatable support processes.

Bottega University | Teaching Associate, Part-Time | 2023 - 2024

Coding Bootcamp | Remote

- Provided technical support to students across Python, JavaScript, React, HTML, CSS, and full-stack development concepts.
- Managed approximately 12-15 student support tickets per week while maintaining clear and timely communication.
- Delivered one-on-one technical guidance by breaking complex coding concepts into actionable steps.
- Supported student success through live troubleshooting sessions, code reviews, and real-time problem solving.

Residential Construction Company | Project Manager | 2018 - 2022

Residential Construction | Panama City Beach, FL and Birmingham, AL

- Managed 15-20 concurrent residential construction projects while coordinating 20-30 subcontractors across multiple job sites.
- Oversaw project budgets totaling approximately $5M while driving projects toward on-time and within-budget delivery.
- Conducted site evaluations to identify safety hazards, resolve project blockers, and maintain compliance expectations.
- Coordinated schedules, materials, subcontractors, and client expectations in fast-moving operational environments.

MILITARY & LEADERSHIP EXPERIENCE

U.S. Marine Corps | Combat Engineer / Operations NCO | 2004 - 2012

Active Duty

- Planned and coordinated training and operational readiness activities for 400+ personnel.
- Led combat engineering operations and supported mission planning during deployments to Iraq and Afghanistan.
- Developed leadership, risk assessment, field operations, and high-pressure decision-making experience in complex environments.

Army National Guard | Team Leader Light Infantrymen | 2015 - 2018

Part-Time / Reserve

- Led teams in reconnaissance, surveillance, planning, and field operations in high-pressure environments.
- Supported training, readiness, and operational coordination across small-team environments.

USAF Contractor | Tactics Instructor | 2014 - 2016

- Delivered 10+ tactical training sessions annually focused on field operations, planning, and team-based execution.
- Trained personnel on tactical movement, land navigation, and operational decision-making.

CERTIFICATIONS

- Certified in Cybersecurity (CC), ISC2
- Google Cybersecurity Professional Certificate
- EC-Council Essentials for Ethical Hackers
- Full Stack Development Certification
